### Projects:

#### **CARDDETAIL APP:**

Cardetail is a Car Explorer application built on Salesforce platform to demonstrate the Salesforce UI Frameworks. The application allows end users to search for different car and get details.

#### **BOOKYOURSHOW: TICKET BOOKING APP**

This is a ticket booking application for various concerts held at various venues. When an individual books a ticket he needs to pay the price according to the availability, like if the availability is less than 10% of total tickets price rise by 10% for premier concerts. Each individual can see all his part a future tickets and past tickets and can also provide feedbacks about past concerts.

#### **COVID19 TRACKER APP**

This is healthcare Application it contains information of hospitals, Patients, Doctors. Here I performed some declarative and programmatic ways like Validation rule to do some restriction, Formulas, Flow send email to patient once he admitted, billing status, once he clear bill received entire payment details, Trigger used.

#### **AVESTA GROUP APP(REAL ESTATE)**

Avesta groups where they will be managing all their Center. We can help them to capture all the status of the Opportunity. If customer ready to take Space on Lease/Contract. All the Account/contacts details of the customers, we maintained in application. we can capture all the payment details for leasing contract. All types of Reports and dashboard for data manipulation and visualization. If Users has any issues, They can raise the case. Here I used some declarative operation page Layouts, Record Types, Roles, Profile, Push Notification, Approval process, Process builder, used permission set and field
